

**Smart Energy Token**

**WE BRING ELECTRICITY ON  
BLOCKCHAIN**

**FACTSHEET**

Smart Energy Token

## SET – SMART ENERGY TOKEN

SET is an ERC-20 token that was created to support the renewable energy market to revolutionize the world. Behind SET is a team that covers all the important areas that are important for realization of the project.

## CONTACT INFORMATION

Smart Energy Provider Ltd.

No. 5 17F Strand 50

50 Bonham Strand

Sheung Wan

Hong Kong

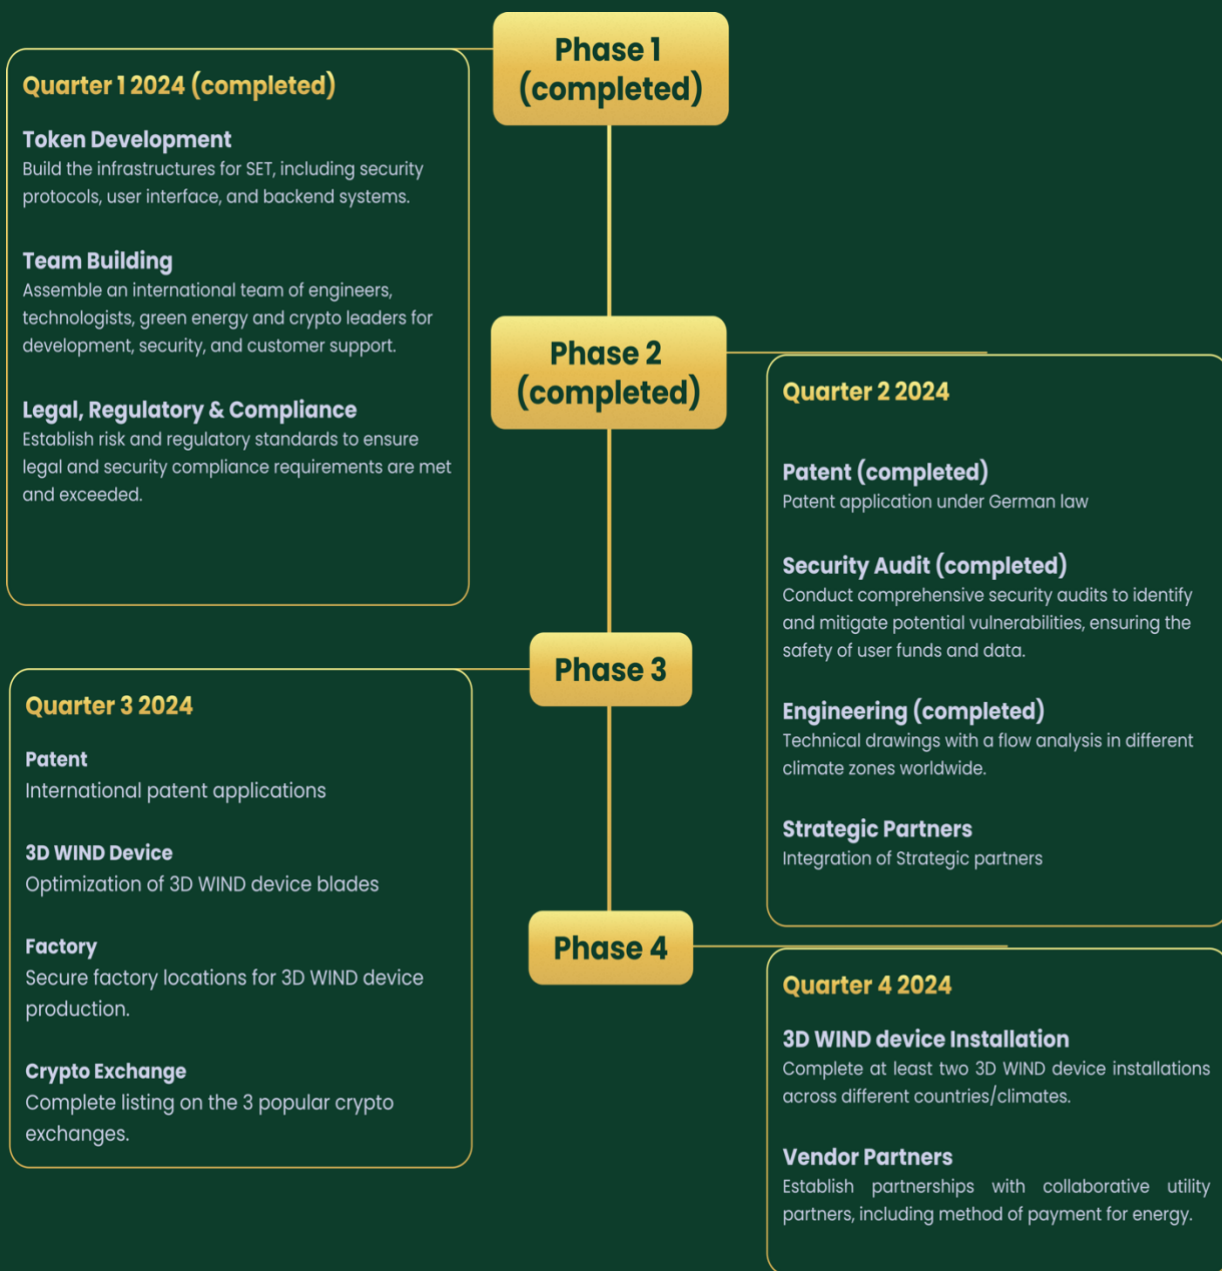

## HARD FACTS

<b>Total number SET</b>	500.000.000.000
<b>Pre-Sale Volume SET</b>	100.000.000.000
<b>Pre-Sale Preis Token in USD</b>	0,001
<b>Start Pre-Sale</b>	15.05.2024
<b>Start crypto exchange</b>	30.08.2024
<b>Starting price exchange per Token in USD</b>	0,005
<b>Mining possible</b>	nein
<b>Burning possible</b>	Ja
<b>Planned crypto exchanges 2024</b>	3
<b>Business content</b>	Research and development of 3D WIND devices Construction of 3D WIND devices Establishment of own brand as energy supplier 100 % reinvestment of income from the sale of electricity in new 3D WIND devices

Smart Energy Token

	Acquisition of partners from the renewable energy sector energies
	Establishment of SET as a means of payment for green electricity worldwide

Smart Energy Token

## Team

**Dirk Delitz**

Founder and Managing Director

**Jean Pierre**

Founder and Managing Director

**Oliver Grohe**

Managing Director – Grohe Technology GmbH

**Chad Williamson**

Real Estate Expert

**Carl Kruse**

Expert in Brand Building and Networking

**Sascha Wagner**

Financial Expert

**Establishment Of SET As a Means of Payment for Green**

**Conventional System**

**SET System**

Rated power (on shore)

2-5 MegaWatt

At least 40 MegaWatt

Tower height

120 m

120 m

Smart Energy Token

Production costs in USD	3-4 million USD	3.1 million USD
Maintenance and Service (20 years)	5,5 million USD	0,9 million USD
Rated Power (off shore)	10-15 MegaWatt	90-120 MegaWatt
Tower height	180-220 m	120 m
Production costs in USD	30-45 million USD	3.4 million USD
Maintenance and Service (20 years)	20-27 million USD	1 million USD

## Wind Energy Calculator

Performance Wind Turbine in kw/h (rated power)	Efficiency in Percent	Quantity Hours wind/day	Generated kw/h per day	Generated kw/h per year
40,000	70.00	14	392.000,00	143.080.000,00

Price per kw/h in USD	Total annual yield USD
0.10	14.308.000,00

IN 2023, MORE THAN 350,000 3D WIND DEVICES WERE IN OPERATION WORLDWIDE WITH A TOTAL RATED OUTPUT OF 1,021 GIGAWATTS (GW), EQUIVALENT TO 1,021,000 MEGAWATTS (MW)

Comparison of renewable energies	Solar Energy	Wind Energy
Total rated output 2022	1185 Gigawatt (GW)	934 Gigawatt (GW)

Smart Energy Token

Total rated output 2023	1530 Gigawatt (GW)	1021 Gigawatt (GW)
Construction costs per GW (without maintenance)	1.2 billion USD	0.8 billion USD
Construction costs SET wind turbine per GW		0.077 billion USD

Renewable energies are growing at an annual rate of around 4 % worldwide. SET would like to and will accelerate this, as the wind turbine developed by SET is significantly more effective and cheaper than solar systems and the existing technology of 3D WIND devices. In addition, the maintenance intervals are significantly longer and more cost-effective.
